On the following pages, final average scores are shown for all core courses taught by Mike Raugh from Spring 2002 to first half of Fall 2005, compared with course scores for co-instructors who taught other sections of the same course during the same half semester.

Courses are shown in reverse chronological order.

Average course scores with standard-error bars are shown for each section of each course. Scores represent a weighted sum over homework and two exams, with one exception noted.

Grading of exams for a course was shared by co-instructors, and homework for different sections of the same course was graded by the same student team, ensuring uniformity.
Math 63A Fall 2004 Raugh and Krieger

Raugh section 2
Raugh section 3
Krieger section 1

Math 64B Spring 2004 Raugh and Castro
